VALENTIN is a very conformationally strong Antonov - son who can show several generations of continuous production cows on the mother's side (6 generations with over 50,000 kg LL) and goes back to the legendary national winner and 100,000 liter cow Babels VINOZAK DIVA (classified 96-93-95). VALENTIN's hereditary profile promises good production with positive components, easy births (paternal and maternal), very good fitness values and a brilliant conformation with very long and wide rumps with a perfect slope, centrally placed turns and very good feet & legs. The udders are attached high and wide and have a very good suspensory ligament. The teat length and placement promise good robot suitability.
