Exterieur 101

Frame	99
Rump	107
Feet & Legs	103
Udder	101

VIALO PP is a homozygous polled bull with a very balanced transmission profile. He promises offspring with good production and very high components, very good milkability with low cell counts and good daughter fertility (109). The births are average, with the maternal calving ease at 112 being very appealing. The conformation profile allows us to expect below-average sized animals with good rump position and centrally placed tumblers. Feet and legs have dry joints, hind legs are correctly angulated and heels are high. The udders are attached firmly, high and wide and very suitable for robots. In Germany, VIALO PP is GZW 125 and GN 110.

Mutter: Vujo Viala P VG-85
