Mallorca

Mallorca is a very well-formed bull and comes from a dam line that is characterized by very well-framed cows with strong udders, high yields, and very good conformation. Mallorca's genetic profile is impressive, combining excellent yield traits with good fitness traits and decent meat quality with high gains. In terms of conformation, we expect very large-framed offspring with wide pelvises, correct feet and legs, and firmly attached, long-set udders. The calving process tends to be easier and the maternal calving process is considered very favorable.
