Halentin P

Halentin P is a perfect type bull with an overall breeding value of 128. The hereditary profile is characterized by a very high milk production (plus beta-casein A2/A2) in connection with good fitness values and very easy births. The meat output also scores very good with 112 FW and high daily gain. In terms of conformation, we expect large-framed animals with optimally sloped rumps, completely correct feet and legs and long attached udders with somewhat shorter teats. With 125 ÖZW, Halentin P is also a high candidate for organic farms.
