Madoc P

Madoc P, the No. 1 Mailand son from a cow family with very good performance and high milk solids, has an interesting aAa code of 462 and a very fitness-oriented hereditary profile. With a high ÖZW and excellent breeding values for fertility, persistence, udder health, longevity, and good milkability, Madoc P promises trouble-free commercial cows with high performance. His easy calving ability makes him suitable for cattle insemination. The linear profile suggests average-sized animals with good pelvic placement and strong feet and legs with high udders. The udders will be set high and have a pronounced central ligament. Teat length and placement are suitable for AMS.
