Pull PP from the Laundl breeding farm is an excellent homozygous polled sire with no weaknesses. Pull transmits a solid production and is one of the three highest PP fitness sires (FIT118) on the market due to exceptionally good values for longevity, udder health and daughter fertility. He also passes on a very good conformation with a lot of frame, good muscles and high, firm udders with longer teats. With an ÖZW of 119, he is also one of the highest PP sires for this breeding value.
