Heeb's Domino PP Red

Domino PP Red remains one of the highest PP sires in Switzerland and comes from the Roxy family. He descends from the show and breeding icon Scientific Debutante Rae EX-92 through a very interesting sire line. With 1,454 kg of milk and now over 90 daughters in the breeding value, Domino PP Red proves to be an excellent dairy sire. He combines this with very good fitness figures, easy births (121 in conjunction with a maternal calving ease of 126), and a functional conformation with average height, slightly sloping rumps, perfectly angulated hind legs, and robot-compatible udders with longer teats.
