4GM: Wilder Herz P EX-90

Maxton PP

Maxton PP is a true standout among homozygous polled sires. His sire, Winstar Macaby-PP, ranks among the highest daughter-proven PP bulls in the U.S. and was rarely used as a contract bull in Europe. His maternal grandsire is SBG Mecca-P, who has impressed internationally with thousands of daughters across various breeding value systems, yet was scarcely present in Germany. The maternal cow family traces back to the famous Wilder Herz P EX-90. Currently, Maxton PP is the No. 1 PP sire according to Swiss breeding values and also scores highly across the board internationally. He impresses in particular with outstanding milk composition and an excellent fitness profile: a long productive life, top udder health with good milkability, and outstanding daughter fertility set him apart. In terms of conformation, he promises offspring with average height, desirable width in the chest and pelvis, and good legs (parallel, slightly angulated hind legs). The udders are high, firmly attached, and have longer teats. Maxton is very well suited for heifers.
