TWH Spike PP Red

Spike PP Red is Sandro P's son and comes from a family of cows that has shined with high components over many generations. The sire stack makes him particularly interesting for Red Holstein breeding, since apart from Solitair only black and white bulls with illustrious names appear. The transmission profile shows Spike PP Red as a very balanced sire who has good milk yield with clearly positive components (plus beta-casein A2/A2). The breeding value of calving ease indicates that he is suitable for heifer insemination. With 123 RZhealthy, 121 somatic cell count and 116 persistence, Spike PP Red is also convincing in the fitness area. The RZE of 120 makes him one of the highest homozygous polled bulls for conformation; wide rumps with a suitable structure, functional feet and legs with optimal angulation of the hind legs and high heels as well as high attached udders with a strong central ligament characterize the linear profile and indicate a high functionality of the offspring.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	113	small				tall
Rip structure	108	tight rib				open rib
Body depth	106	shallow				deep
Strength	91	frail				strong
Rump angle	93	high pins				sloped
Thurl width	101	narrow				wide
Rear legs side view	96	posty				sickled
Foot angle	95	flat				steep
Hock quality	109	coarse				dry
Rear legs rear view	100	hocked in				parallel
Front feet orientation	86	hocked in				parallel
Locomotion	107	poor				good
Rear udder height	124	deep				high
Udder cleft	110	weak				strong
Front teat placement	101	wide				close
Rear teat placement	107	wide				close
Fore udder attachment	103	loose				strong
Udder balance	148	ht				vt
Udder depth	110	deep				high
Teat length	95	short				long
