Mojito PP RF

Mojito PP is a son of Mo from an alternative sire line for polled breeding that excludes bloodlines from Solitaire, Member, Can, Handout, Dragon, etc., making him suitable for use with most of the offspring of the P-sires currently used in Germany. Mojito PP impresses with strong performance and very high nutrient content, ranking among the top PP sires in terms of fat yield per kilogram. He also stands out for his excellent health and fitness scores, including high calf fitness and good calving traits. His offspring are expected to exhibit strong dairy conformation, balanced, broad hips, and very good, tall, and firm udders. With an RZRobot score of 111, Mojito is also very well suited for use on AMS farms.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	126	small				tall
Rip structure	113	tight rib				open rib
Body depth	97	shallow				deep
