Summit PP Red

Summit PP Red is a son of Sainz P, hailing from the globally successful cow family of Nova-TMJ Golden Echo/UFM-Dubs Eroy—a lineage that has already produced numerous high-quality male and female offspring in Germany.
++ His production breeding value is characterized by excellent milk yield, high fat content, and positive protein levels, complemented by outstanding lactation persistence.
++ With low somatic cell counts, excellent hoof health, resistance to digital dermatitis (Mortellaro), and an overall RZGesund (health index) score of 119, Summit PP Red contributes to a long productive life.
++ His conformation profile points to medium-sized animals with great strength and wide pelvises, as well as parallel, slightly straighter hind legs. The udders are high-attached with longer, more widely spaced teats. When planning matings, attention should be paid to the central ligament.
++ His calving rates are average, his maternal calving performance is rated very favorably, and according to ÖZW, he is among the country's top PP sires.
