4GM: Seagull Bay Miss America EX-91

GG Ken PP Red

Ken PP Red is a homozygous polled sire who goes back to the internationally influential full sister of Supersire - Seagull Bay Miss America EX-91. Ken also has an alternative bloodline for red polled breeding and can be used well on offspring of Solitair P, Gywer or various Mission P sons, as the polledness on the dam's side was only introduced after four generations via the American outcross sire Effect P. Ken PP offers a very complete profile of production, fitness and very good conformation. He passes on a lot of body depth, strength, wider rumps, good feet & legs and high, firm udders with longer teats. Ken PP is therefore also very suitable for AMS farms.
