Netflix PP RF

Netflix PP RC is an early Speedy son who goes back via the outcross sire Kitami to the very influential family of MR Snow Aida VG-86 (Dixie-Lee Aspen EX-92), from which a number of insemination bulls have already been used at home and abroad. Netflix himself convinces with a high production with positive components, a good longevity as well as an attractive conformation with sloping rumps, the slightly angled hind legs often sought after for compensation and very good udder inheritance with longer teats. Due to very easy births, Netflix can be used well on heifers. As the red factor has been passed down through generations of sbt. ancestors, Netflix is also an interesting option for Rbt. breeding. Netflix is not out of ET and tests kappa-casein BB.
