Cupra PP

Cupra PP is an outcross sire, as his already successfully daughter-tested sire Chew-P has hardly been used in Europe. His grandfather is the (horned) Canadian top sire Monteverdi, followed by 13 generations of VG and EX-rated dams from the Aristocrat cow family.
Cupra PP himself impresses with a high total breeding value, good performance with positive components, and an excellent conformation. His offspring can be expected to have good body depth, strength, and milk type, with broad, sloping pelvises on very good feet and legs with slightly angulated hind legs. He also passes on excellent, high-set, broad udders. Cupra is well suited for use on heifers.
