GG Banksy PP

Banksy PP goes back to the very successful family of Larcrest Cosmopolitan and is the No. 1 PP Banjo son worldwide and still one of the highest PP sires with a type value of at least 1.70 PTAT. His sire Banjo is an absolute outcross sire for European polled breeding and Banksy also has an alternative pedigree and can be used well on the offspring of widely used sires such as Simon P, Hotspot P or Solitaire P and their sons. Banksy himself is a very complete sire with high production, good daughter fertility and an attractive conformation with lots of strength, wide rumps, good feet & legs and highly attached robot udders with longer teats.
