Pacco P

PACCO P is a descendant of Charl's son Pikachu and comes from the high-producing bull dam and Starr P - daughter Sensation PP VG 85. The paternal succession behind Pacco P makes him a widely usable sire due to the different bloodline. Pacco P's inheritance profile shows him - in keeping with the family tradition - as a high-performance sire with good ingredients (plus beta-casein A2/A2). Pacco P is also impressive in terms of fitness characteristics. The milkability is average and the easy birth process also makes him suitable for heifer insemination. In terms of conformation, the linear profile suggests the modern free-stall cow with medium size, a lot of development potential, correct pelvises and functional feet and legs. The udder characteristics indicate good suitability for AMS.
